Kim,

We are planning a meeting for May 19, 2015 in Bristow, Oklahoma and will be calling on you for a fact sheet, possible meeting announcement or adv. and numerous posters for an open house. Two of the items are attached, the aerial and old refinery that we would like on foam core 2 x 3 would be fine.(standard size is fine if different or cheaper) Please produce these one each and I will keep you informed as things develop. See the emails below;

Thanks,
Bill

Hey Bill, I will be going to ODEQ next week and we will talk in more detail about what it is we want. There are three posters I would like to make: (1) site location (2) the 1941 aerial photo (not sure if the jpg or pdf is better to enlarge) and (3) old refinery. The aerial and old refinery are attached.

Todd, do you have a good site location map? One that shows the location within the state, location in relation to the town, and then shows the site as it exists today? I am thinking that the site today is the large figure, and the locations within the state and town are small insets.

In a brief conversation, DEQ expressed interest in going 'green'. They want to have a GIS person there with a computer to let folks view and interact with maps. I will be taking mine plus another, so that will give us two additional computer stations for PowerPoints that folks can thumb through. Maybe one on aerials, one on site history read, one on sampling?

I expect that we will need to update the factsheet. I will work with Todd on getting that together. Then we can take copies that folks can take with them.

Katrina,
Please let me know what kind of posters, etc. we will need for the open house. I would like to get things prepared in advance and make arrangements for any easels, etc. we will need for the meeting.
Thanks,
Bill
